

5.5. Innovations by the Faculty in Teaching and Learning

Innovations by the Faculty in teaching and learning shall be summarized as per the following description.

Contributions to teaching and learning are actions that lead to the enhancement of student learning. These actions can be innovations such as, application of ICT, delivery of instruction, instructional strategies, evaluation, assessment and inclusive classrooms that result in effective, efficient and motivating instruction. These methods help stimulate young minds and enhance their learning capabilities.

To improve students' overall learning experience, faculty members are encouraged to move beyond conventional teaching methods and adopt more creative and engaging instructional strategies.

Any contribution to teaching and learning must meet the following requirements:

5.5 Innovations by the Faculty in Teaching and Learning(15)

- A. The work must be made available on Institute Website (2)**
- B. The work must be available for peer review and critique (3)**
- C. The work must be reproducible and developed further by other scholars (2)**
- D. Statement of clear goals, use of appropriate methods, significance of results, effective presentation and reflective critique (8)**

Our college website has been made very student friendly wherein all the information and past question papers are made available to the students.

Teaching-Learning Process (TLP): Adequate Preparation with the Use of Appropriate Methods

Adherence to Academic Calendar and Teaching-Learning Implementation

The institute prepares the academic calendar in advance of each semester and shares it via the website and email with students, parents, and faculty. It outlines key activities including internal assessments, academic reviews, and events like workshops, guest lectures, and industrial visits. Subject orientation at the semester's start includes course overview, practicals list, course outcomes (COs), CO-PO mapping, course materials, assignments with solutions, past exam papers, and the academic schedule with class timetables.

Teaching-Learning Implementation

Each course is allotted 4 hours per week plus practical sessions

. Learning is supported with digital tools, and implemented in steps:

1. Introduction of COs, POs and PEOs.
2. Student-led learning
3. ICT-based content engagement
4. Application through programs/models
5. Competitive assessment via quizzes, presentations, etc.

A structured formative assessment (FA) plan is followed using tools like MS Teams and Google Forms, including open-book and online tests.

Value-Added Activities at ANCP

The vision of ANCP is to instill in students the importance of continuously upgrading their knowledge and staying abreast of modern tools and technologies used in the profession.

To achieve this, ANCP has implemented the following initiatives for students:

Academic & Technical Activities

1. Guest Lectures by Industry Experts

- Guest lectures on advanced topics (e.g., career paths, overseas opportunities) and pre-scheduled practical experiment lists enrich the academic experience. On current trends like AI in drug discovery, pharmacovigilance, regulatory affairs, etc.

2. Workshops on Modern Tools

- Hands-on training in software like PharmaSim, Chemdraw, Molecular Docking Tools, etc.

3. Certification Courses

- Short-term online/offline courses on Clinical Research, Data Analytics in Pharmacy, Good Manufacturing Practices (GMP).

Research & Innovation Activities

4. Mini Research Projects

- Final-year students participate in guided research with emphasis on current innovations.

5. Participation in Hackathons / Ideathons

PRINCIPAL
ANNAMACHARYA COLLEGE OF PHARMACY
NEW BOYANAPALLI - 516 126
RAJAMPET, ANNAMAYYA Dist. A.P

- Encourage students to innovate in areas like health-tech apps or smart dosage tracking systems.

6. Publication Drives

- Supporting students in publishing articles in reputed journals or conferences.

Digital & Blended Learning Tools

7. Integration of Virtual Labs & Simulations

- Use of digital platforms for pharmacology experiments, biopharmaceutics, etc.

8. NPTEL / SWAYAM Enrollment

- Hence it is important for our team to inculcate self-learning to our students to achieve lifelong learning and to tune with times. ANCP promotes this learning activity through curricular and extra-curricular activities. ANCP has subscribed Coursera courses for self-learning. Course coordinator identifies the platforms and modules for Self Learning (online platforms like NPTEL, SWAYAM, MOOCS, Coursera etc.) and inform the students about this before the Exam Enroll students in free or certified government MOOCs on pharmacy-related topics.

Career & Skill Development

9. Mock Interviews & Resume Building Workshops

- Training in communication, personal branding, and job readiness.

10. Industrial Visits

- Exposure to manufacturing units, quality control labs, or clinical trial centers.

11. Skill Development Sessions

- Covering drug regulatory affairs, pharmacy automation, telepharmacy, etc.

Availability of Facility, Materials and Scope for Learning

S.No.	Activates	Beneficiary	Details
1	Library System	Faculty & Students	The institute has the effective Library The library is facilitated with more than Sixty thousand two hundred books and more than three thousand e-books, material, NPTEL video for students.
2	Availability of Internet facility in all labs	Faculty & Students	Our institute has dedicated 40 Mbps lease line with 100% uptime. The labs are equipped with internet facility and at any time internet can be made available in all the labs.
3	MOOCs like Swayam	Faculty & Students	SWAYAM is a programme initiated by government of India, the objective of this effort is to take the best teaching learning resources to all
4	Personality Development Lectures	Students	Creativity, lateral thinking and communication / people management skill are essential components for progress in any sphere. Students are encouraged to develop these through goal setting exercises, group discussions, mock interviews and presentations.
5	Placement Training Classes	Students	Special classes conduct to improve Aptitude, Reasoning (Verbal and nonverbal), Soft skill and communication of students for placement purpose
6	Industrial Visit	Students	To bring the gap between Industry and academia, various modules are covered
7	Training Program / Workshops / Seminars	Students	To enhance knowledge and develop technical skill
8	Technical Events	Students	To enhance the technical knowledge
9	International / National Conferences	Facilities & Students	For sharing new ideas and innovation common platform is provided.
10	FDPs	Faculty	Development of faculty
11	Social activities	Students	All round development essentially means intellectual physical, moral, sensible and social development.
12	Assignments	Students	It enabled students to go through the topics in a more elaborate manner in order to explore the academic topic which lead to an overall better learning experience for students. Assignments help the students to understand the subjects in a more details pattern

1.EXPERIENTIAL LEARNING

a) Carton boxes

During the Internal Viva-voce the students are shown these Empty medicine packaging boxes and are asked to identify the drug, category it belongs to, therapeutic use, mechanism of action, adverse drug reaction etc. This task enables them to apply their knowledge that has been imparted in the theory classes.

Aspect	Details
Objective (Statement of Clear Goals)	To enhance students' understanding of drug classifications, dosage forms, and pharmacological actions using real or mock medicine cartons creatively presented.
Description	Students use empty or mock medicine boxes to create models, posters, or 3D displays showing drug class, mechanism of action, dosage, side effects, brand/generic names, etc.
Significance of Results	Improved recall of pharmacological concepts through visual and tactile engagement. Boosted creativity, communication, and peer learning.

Mapping with Program Outcomes

PO	Outcome	Justification
PO1	Pharmacy Knowledge	Students apply core pharmacological concepts while identifying drugs.
PO2	Planning Abilities	Students plan their displays, manage time and resources, and collaborate effectively.
PO3	Problem Analysis	Students analyze drug properties and solve how best to represent them for educational clarity.
PO4	Modern Tool Usage	May include use of digital elements, QR codes, or software for label creation.
PO6	Professional Identity	Promotes role awareness as drug educators and medication experts.
PO8	Communication	Students communicate drug information clearly to peers and evaluators.
PO11	Life-long Learning	Encourages curiosity and self-directed learning beyond textbook content.

PRINCIPAL

ANNAMACHARYA COLLEGE OF PHARMACY
NEW BOYANAPALLI - 516 126
RAJAMPET, ANNAMAYYA Dist. A.P

b) Visit to Animal House

Animal experiments are essential to understand drug action and evaluate efficacy and safety. During practical sessions, students are briefed on regulatory norms for breeding and maintaining small animals. They are also introduced to animal house operations, including the two-corridor system, husbandry practices, and procedures for cleaning and waste disposal.

Visit to animal house

Aspect	Details
Objective (Statement of Clear Goals)	To familiarize students with animal models used in pharmacological and toxicological studies, understand ethical handling, housing standards, and experimental protocols.
Description	A guided academic tour to the institution's or affiliated animal house facility, focusing on learning about animal care, standard operating procedures (SOPs), CPCSEA guidelines, and laboratory animal applications in drug discovery.
Significance of Results	Improved conceptual clarity in preclinical testing and ethical pharmacology practices. Preparedness for research and industry standards.
Methodology	Observation, interaction with animal facility staff, and faculty-led explanations, followed by reflective discussion/report.

Mapping with Program Outcomes

PO	Program Outcome	Relevance to Activity
PO1	Pharmacy Knowledge	Students observe application of pharmacology in preclinical drug testing.
PO3	Problem Analysis	Understanding animal models used for analyzing drug effects and toxic responses.
PO4	Modern Tool Usage	Exposure to equipment and techniques used in animal experimentation.
PO6	Professional Identity	Students realize their role and responsibility in ethical research practices.
PO7	Pharmaceutical Ethics	CPCSEA and animal handling rules stress ethical considerations.
PO11	Life-long Learning	Encourages interest in research and further exploration in pharmacological studies.

c)Computer Assisted Learning for understanding drug biological response

The ANCP Department of Pharmacology focuses on experimental hand-on training. Although conventional demonstrations in animal models are informative, regulation imposes constraints in using animals. This has been overcome through Computer Assisted Learning (CAL) programs that model pharmacological experiments on models such as the heart, eye, ileum, and blood pressure. Interactive, animated software imitates laboratory conditions precisely to enable the visualization and perception of drug action without live animals.

Alternative Animal Experimentation (Simulation tools)

S.No.	Name of the software	Category	Applications
1.	Ex-Pharma	Subscribed	This is a computer assisted learning package containing various programs which simulate animal experiments in <i>Pharmacology</i>
2.	Micromedex	Subscribed	This indexing database provides access to full-text tertiary literature. This tertiary literature is unbiased, referenced information about drugs, toxicology, diseases, acute care, and alternative medicine.

Mapped Program Outcomes

PO	Program Outcome	Justification
PO1	Pharmacy Knowledge	Deepens understanding of pharmacological principles via simulation.
PO3	Problem Analysis	Helps analyze drug actions and predict therapeutic outcomes using virtual models.
PO4	Modern Tool Usage	Applies computing tools in pharmacological education — key digital skill.
PO7	Pharmaceutical Ethics	Reduces animal use, aligning with ethical and regulatory standards.
PO11	Life-long Learning	Encourages use of evolving tech tools for ongoing skill enhancement.

Patient counselling

The steps in patient counselling will vary according to the environment and practice conditions. Counselling is beneficial to students since it is a learning experience. Students will be able to listen and learn about the patients concerns, questions, and needs; helps student to ask questions, show empathy and encouragement, tailor counselling to meet the patients' needs, and motivate patients. They will also learn to effectively communicate in simple language and tailor the necessary information according to the patients understanding.

Patient Counselling in GGH, at Kadapa

Mapping of Program Outcomes

PO	Program Outcome	Justification
PO1	Pharmacy Knowledge	Applies drug knowledge to real-world patient scenarios.
PO5	Leadership Skills	Encourages taking initiative in healthcare communication.
PO6	Professional Identity	Reinforces the pharmacist's clinical and public role.
PO7	Pharmaceutical Ethics	Fosters responsible, ethical interaction with patients.
PO8	Communication	Core outcome — strengthens verbal and non-verbal patient communication.
PO9	Pharmacist and Society	Connects pharmacy practice with public health outcomes.
PO11	Life-long Learning	Continuous improvement in patient care and soft skills.

c) Drug information

This service is intended to provide advice for health care providers regarding the various aspects of drug therapy and its management. This provides an evidence-based information from literature search. Drug related queries from physician during ward rounds will be addressed by the students. Information gathered will be synthesized and conveyed based on the priority.

With this service students will be able to

- Understand how to retrieve and interpret drug and biomedical literature.
- Provide systematic approach to address the query
- Develop communication skills
- Understand the disease and therapeutic information

Drug Information Centre

Mapping with Program Outcomes

PO	Program Outcome	Justification
PO1	Pharmacy Knowledge	Applies core knowledge in evaluating pharmacological, clinical, and pharmaceutical data.
PO2	Planning Abilities	Involves timely research and organized presentation of drug information.
PO3	Problem Analysis	Analyzes drug interactions, side effects, and therapeutic alternatives.
PO4	Modern Tool Usage	Utilizes digital databases and tools for literature search and reporting.
PO6	Professional Identity	Reinforces pharmacist's role in guiding drug-related decisions.
PO8	Communication	Focuses on effectively communicating complex drug information.
PO11	Life-long Learning	Encourages continual learning to keep up with new medications and evidence.

2. ICT BASED LEARNING

a) Teachers use ICT Enabled tools for effective teaching-learning process

Annamacharya College of Pharmacy integrates a variety of ICT tools into its teaching-learning process, enhancing students' learning potential, fostering active participation, and building self-confidence and self-esteem. The college provides a robust IT infrastructure, including computers, LAN connectivity, and internet access with a speed of 40 Mbps to support technology-enabled education. Classrooms are equipped with LCD projectors, and e-classrooms have been established to facilitate virtual learning experiences.

Faculty members effectively utilize Learning Management Systems (LMS) and online platforms like Google Meet, Cisco Webex, and Microsoft Teams for conducting classes. They also incorporate teaching aids such as MOOCs, e-PG Pathshala, and SWAYAM. The institution previously employed the Clinical Learning Pharmacology Package for pharmacology experiments, now replaced by the Ex-Pharm Series. Additionally, the college subscribes to *Micromedex*, a comprehensive drug information database.

The Digital Library is equipped with computers for accessing e-books, e-journals, and databases such as KNIMBUS, along with resources like e-ShodhSindhu and e-ShodhGanga. Library operations are automated using TLSS software. Faculty members stay updated by conducting literature searches through research databases like Web of Science, PubMed, Google Scholar, Elsevier, and Springer, ensuring the teaching-learning process remains relevant and well-informed.

b) ICT Supported Learning with LCD projectors, Power point Presentation, NPTEL,

e) Digital Library resources (KNIMBUS)

The use of ICT (Information and Communication Technology) enabled tools in the teaching-learning process is highly encouraged. These tools enhance the effectiveness of education by making it more interactive, accessible, and student-centered. Here's how ICT-enabled tools are utilized for effective teaching and learning.

Seminar Rooms- Seminar hall is equipped with all digital facilities, projector, mike, and computer system.

3.VIRTUAL TEACHING

Methodology employed: Teaching through Virtual tools such as

- Swiss dock
- Swiss ADME
- Auto Dock
- Openbabel
- Chempider
- Chemdraw

• **List of open-source and subscribed software support for advanced learning**

S. No	Name of the software	Category	Applications
1.	AutoDock 4.2.0	Opensource	AutoDock 4.2.0 is a widely used molecular docking software developed by the Scripps Research Institute. It is designed to predict the preferred orientation of a small molecule (ligand) when bound to a large molecule (typically a protein or DNA)
2.	Way2drug	Opensource	The Way2Drug informational-computational platform provides access to the data on drugs approved for medicinal use in the USA and Russian Federation, as well as computational possibilities for the prediction of biological activity of drug-like organic compounds
3.	Open babel	Open source	Open Babel is a chemical informatics toolkit that allows for the conversion of chemical file formats, analysis, and manipulation of molecular structures. It is widely used in computational chemistry, bioinformatics, and cheminformatics due to its flexibility and broad compatibility with various chemical data formats.
4.	OBS	Open source	OBS , short for Open Broadcaster Software , is a popular free and open-source software suite used for video recording and live streaming. OBS Studio, its most commonly known version, is favored by gamers, content creators, educators, and professionals for its versatility and wide range of features.
5.	Swiss Dock	Open source	Molecular docking between ligand and receptor
6.	Swiss ADME	Open source	Prediction of ADME properties
7.	PaDEL	Opensource	Calculation of different descriptors of QSAR
8.	Chempider	Opensource	<i>ChemSpider</i> is a free chemical structure database providing fast text and structure search access to over 100 million structures from hundreds of data sources.

This website allows you to compute physicochemical descriptors as well as to predict ADME parameters, pharmacokinetic properties, druglike nature and medicinal chemistry friendliness of one or multiple small molecules to support drug discovery.

The main article describing the web service and its underlying methodologies is SwissADME: a free web tool to evaluate pharmacokinetics, druglikeness and medicinal chemistry friendliness of small molecules. *Sci. Rep.* (2017) 7:12717.

For details about development and validation of ILQG, please refer to this article: ILQG: a simple, robust, and efficient description of *n*-octanol/water partition coefficient for drug design using the GB/SA approach. *J. Chem. Inf. Model.* (2014) 54(12) 3294-3301.

For details about development and validation of the BOILED-Egg, please refer to this article: A BOILED-Egg to predict gastrointestinal absorption and brain penetration of small molecules. *ChemMedChem* (2015) 11(11) 1117-1121.

Developed and maintained by the Molecular Modeling Group of the SIB | Swiss Institute of Bioinformatics.

Compound 01 docking interactions with SARS Spike Glycoprotein human ACE2 inhibitor

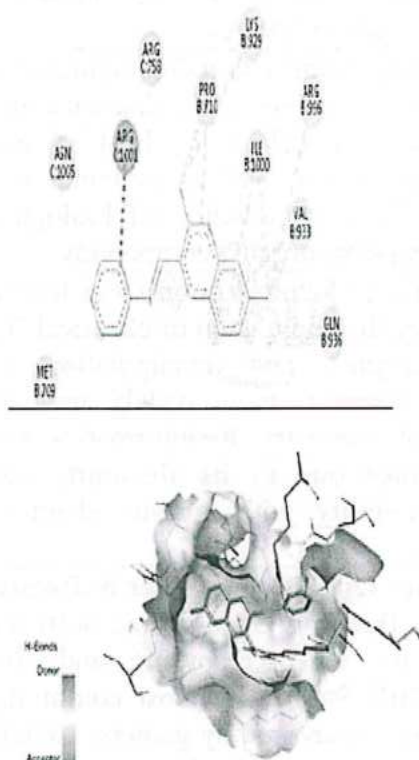

Figure 1: a) represents 2D interactions of compound 01, b) represents 3D interaction formed by the compound 01 with drug target.

Compound 02 docking interactions with SARS Spike Glycoprotein human ACE2 inhibitor

Figure 2: a) represents 2D interactions of compound 02, b) represents 3D interaction formed by the compound 02 with drug target.

Prediction of binding interactions using Swiss dock

b) Virtual Lab:

To provide remote-access to simulation-based Labs in various disciplines of Pharmacy.

Simulation tools:

S.No	Name of the software	Category	Applications
1.	Ex-Pharma	Subscribed	This is a computer assisted learning package containing various programs which simulate animal experiments in <i>Pharmacology</i>
2.	Micromedex	Subscribed	This indexing database provides access to full-text tertiary literature. This tertiary literature is unbiased, referenced information about drugs, toxicology, diseases, acute care, and alternative medicine.

4.SELF LEARNING

Self-Learning method is an individualized method of learning collecting information, processing it, and retaining it without the needs for another individual to teach it. For self-learning or learning beyond syllabus during the semesters we provide information sharing material and organize different types of activities like workshop, training, conferences, club activities, quiz etc. For these activities academic calendar has sufficient provisions and HOD is authorized to change in schedule with permission of respective authorities.

Scope of Self – Learning

- Assignments
- Professional bodies
- Web based learning
- Library
- Industrial visits

NPTEL:

Faculty members and students are motivated to take up online courses for their subjects from various eminent platforms like NPTEL.

The main objective of the National Programme on Technology Enhanced Learning (NPTEL) is to enhance the quality of science education in the country by developing content for undergraduate and postgraduate curricula using video and web-based courses. These courses cover the syllabi prescribed by universities and approved by AICTE.

PO	Program Outcome	Relevance to Blended Learning Activity
PO1	Pharmacy Knowledge	Online modules and in-person discussions reinforce core pharmaceutical concepts.
PO2	Planning Abilities	Students plan their learning schedules, manage coursework between digital and classroom modes.
PO3	Problem Analysis	Case-based learning online encourages analytical thinking and clinical decision-making.
PO4	Modern Tool Usage	Use of LMS platforms, simulation software, and virtual labs enhances digital competency.
PO5	Leadership Skills	Opportunities to lead peer learning discussions and collaborative online projects.
PO6	Professional Identity	Exposure to professional e-content and real-time discussions enhances pharmacist role understanding.
PO7	Pharmaceutical Ethics	Online modules often include ethical case scenarios, reinforcing regulatory and ethical standards.
PO8	Communication Skills	Students improve digital communication through forums, video presentations, and collaborative tasks.
PO9	Teamwork and Collaboration	Online group projects and peer evaluations foster virtual teamwork and collaboration.
PO10	Environment & Sustainability	E-learning reduces paper usage and supports sustainable academic practices.
PO11	Project Management & Finance	Managing time, resources, and goals across blended modules enhances project planning skills.
PO12	Life-long Learning	Self-paced online content encourages students to pursue continuous, independent learning.

6. DESIGN BASED AND GROUP ACTIVITY EXPERIMENTS

Case Study Method

The case study approach enables pharmacy students to identify and analyse common real-world challenges encountered in various pharmaceutical and healthcare settings. Students are encouraged to review clinical or industry-related cases, understand the pharmaceutical context, identify core problems, propose appropriate solutions, and actively participate in classroom discussions. These domain-specific case scenarios focus on practical issues in areas like drug development, regulatory affairs, quality assurance, and hospital pharmacy practice. Case studies are also used as group discussion topics to enhance students' problem-solving, communication, and critical thinking skills crucial for success in the pharmaceutical field.

To enhance student's knowledge through collaborative learning

Case Study/ Mini Project/ Presentation for these students are asked to form a group of 2-3 within the batch for performing the case study/ Mini Project/Presentation as the subject.

Case Study Based Learning

PO	Program Outcome	Relevance to Activity
PO1	Pharmacy Knowledge	Activities involve applying core concepts of pharmaceutics, pharmacology, and pharmacognosy.
PO2	Planning Abilities	Students plan experiments, manage resources, and design protocols for project-based learning.
PO3	Problem Analysis	Analyzing scientific problems and proposing experimental solutions during formulation or testing.
PO4	Modern Tool Usage	Use of instruments, simulation software, and lab technologies for design-based experiments.
PO5	Leadership Skills	Students lead mini-projects or coordinate group activities, building team responsibility.
PO6	Professional Identity	Understand pharmacist roles in research, community service, and interprofessional collaboration.
PO7	Pharmaceutical Ethics	Ethical considerations in research design, data handling, and patient-centered thinking.
PO8	Communication Skills	Oral/poster presentations, report writing, and group discussions enhance communication.

PRINCIPAL
ANNAMACHARYA COLLEGE OF PHARMACY
 NEW BOYANAPALLI - 516 126
 RAJAMPET, ANNAMAYYA Dist. A.P.

PO9	Teamwork and Collaboration	Group experiments foster team coordination and multidisciplinary collaboration.
PO10	Environment & Sustainability	Activities include green chemistry, waste reduction, and eco-conscious formulation design.
PO11	Project Management & Finance	Budgeting, resource management, and timeline execution during projects.
PO12	Life-long Learning	Encourages critical thinking, exploration of recent advances, and self-directed learning.

7. PROJECT BASED LEARNING:

Project-Based Learning (PBL) is an **active, inquiry-based educational approach** that aims to cultivate **critical thinking** and **problem-solving skills** in students. By engaging with real-life challenges presented in the form of projects, students learn through exploration and practical application. This method promotes **self-directed learning**, enhances **conceptual understanding**, and encourages creativity. Collaborative team activities further support personal development by providing a platform for students to exchange ideas and work together effectively.

Objectives of Project-Based Learning:

- ✓ **Assess True Understanding:** Helps evaluate students' actual grasp of concepts beyond memorization.
- ✓ **Enhance Interpersonal Skills:** Encourages teamwork, communication, and collaboration.
- ✓ **Foster Conceptual Clarity and Creativity:** Supports the development of innovative thinking and deeper understanding.
- ✓ **Empower Students with Real-World Problem Selection:** Allows students to choose relevant, practical problems to solve.
- ✓ **Enable Comprehensive Skill Assessment:** Offers a more effective model for evaluating students' applied skills and competencies.

The “**INTERNAL HACKATHON FOR SIH 2024**” held on September 18, 2024 at smart class room (F023), Annamacharya college of Pharmacy (Autonomous), Rajampet, Annamayya Dist., Andhra Pradesh. The Hackathon was inaugurated by Dr.D.Swarnalatha, Professor & Principal of Annamacharya college of Pharmacy. Her speech focused on the value of unconventional thinking and how it can assist students in transforming their ideas into products and accomplishing amazing things. In addition to stating that this is the first hackathon to be held on campus, Mr. Simham Sudhakar (SPOC, Annamacharya College of Pharmacy) also described the goals and purposes of the program. This nationwide initiative aims to give students a platform to solve some of the most problems of daily life in order to instill a culture of product innovation and a problem-solving mindset.

A total of 05 teams (30 students, 14 male, and 16 female) of students have registered and (27 Students, 12 Male, and 15 Female) of students have Participated in this event. As per the guidelines of Smart India Hackathon – 2024, and to encourage female participation in innovative projects, each team consists of at least one female student as a member.

The institute's participant's worked on 03 distinct problem statements highlighted by various departments of the Indian government agencies. The participants picked three software problems and

two hardware problems. To analyze and shortlist the teams, the institution chose three judges with academic backgrounds in diverse domains. The hackathon attracted 05 teams totaling 30 students. The presentations on various concepts began at 04:15 PM.

The evaluation process followed the SIH 2024 format; the jury explained the selection process. The program continued with the presentation of all teams. Each team had 15 minutes for each problem. From 05 batches, all ideas have been shortlisted and will be uploaded on the SIH portal.

Judging Process:

Each team had 15 minutes to present their solutions, followed by a question-and-answer session with the judges. The presentation was divided into a team introduction, problem statement and solution explanation, counterpoints and suggestions from the jury members. The jury evaluated the presentation based on the established criteria and gave constructive feedback. The process was transparent and focused on identifying solutions with high impact and feasibility potential.

Jury panel details:

The jury consisted of three distinguished academic leaders who brought academic rigor and an understanding of the theoretical foundations. The jury evaluated each team's solution based on innovation, creativity, technical feasibility and practicality. The jury members discussed each project together and exchanged their expert opinions before making a final decision. Based on their ratings, the jury selected teams.

PO	Program Outcome	Relevance to Hackathon Activity
PO1	Pharmacy Knowledge	Students apply foundational pharmaceutical knowledge to propose innovative health-related solutions.
PO2	Planning Abilities	Teams develop structured project plans, timelines, and resource allocation for solving real problems.
PO3	Problem Analysis	Hackathons focus on identifying real-world healthcare/pharmacy problems and designing viable solutions.
PO4	Modern Tool Usage	Encourages use of data analysis tools, simulations, or digital platforms to develop working models.
PO5	Leadership Skills	Students take initiative, lead teams, and manage tasks to complete projects under deadlines.
PO6	Professional Identity	Builds awareness of the pharmacist's role in public health innovation and tech-based solutions.
PO8	Communication Skills	Teams pitch ideas and present outcomes effectively to judges and peers.
PO9	Teamwork and Collaboration	Multidisciplinary teamwork enhances coordination, cooperation, and collaborative problem-solving.
PO11	Project Management & Finance	Budget planning, cost estimation, and viability of proposed ideas are integral to hackathon scoring.
PO12	Life-long Learning	Motivates students to continuously explore tech, entrepreneurship, and pharma innovations.

PO	Program Outcome	Relevance to Quiz Activity
PO1	Pharmacy Knowledge	Quiz assesses understanding of industrial processes, departments, and documentation.
PO3	Problem Analysis	Application-based questions (e.g., in-process checks, regulatory issues) test analytical skills.
PO4	Modern Tool Usage	Questions on equipment, QC tools, and production systems reflect tool and tech understanding.
PO6	Professional Identity	Quiz emphasizes pharmacist roles and responsibilities observed in the industry.
PO7	Pharmaceutical Ethics	Tests ethical practices, compliance with regulations like GMP and CPCSEA.
PO10	Environment & Sustainability	Includes sustainability-related practices in pharma industries.
PO12	Life-long Learning	Reflective and career-based questions promote continuous learning and awareness.

9. Employability training and career guidance

Career guidance can help the students to choose their career option based on their interest. It is necessary to ensure that the students are put on the right path for becoming valuable citizens to the real world. Every student has to introvert in order to choose the right career in his life and also faculty can guide them to choose their career on self-interest.

As a part of the career guidance we have been adopted awareness and orientation programmes to the students from 1 year onwards based on their interest on seeking job/ higher studies / entrepreneur. Once they choose their career upon that we train them on activities like Technical training programmes that help every individual to achieve their goal. We bring the industry experts & HR's from different fields to bridge the gap between the academics and industry making the students to focus on current technologies and exaltation themselves continuously.

Pre-placement training activities/Company specific training is conducted for eligible students so as to crack the job in the company. Online tests(programming Aptitude, English and Reasoning) Aptitude Tests, Group Discussions, Personal Interviews and Personality Development Workshop give students exposure to various requirements of industries and train them in every aspect. We ensure that each and every student of this institution gets an opportunity to be placed in some of the best companies of the nation. Placements are just one of the meeting points that facilitate the exchange of knowledge between the students and the industry. It is a platform for opportunities where companies are invited to recruit students of various specializations. In our institution the recruitment process is as follows:

1. Initiation of Student enrollment from 2 year onwards for training and placements.
2. Training and Placement department train the enrolled students in the following aspects:
 - Facing Interviews.
 - Facing Group Discussions.
 - Professional Resume Writing.
 - Cracking Aptitude Exams.
 - Skill Development Sessions & Programs.
 - Preparing Mock Exercises.
 - Recruitment and Placement Sessions.
 - Arranging Seminars and Technical talks.
 - Basic Grammar
 - Improving the communication abilities of students and technical knowledge of student.
3. The practice sessions are conducted regularly through on-line portals

Mapping of Industrial Visit with Program Outcomes

PO	Program Outcome	Relevance to Activity
PO1	Pharmacy Knowledge	Students observe real-time application of pharmaceutical manufacturing and QC processes.
PO2	Planning Abilities	Understand workflow, resource management, and scheduling in industrial settings.
PO4	Modern Tool Usage	Exposure to advanced instrumentation, automation, and GMP tools used in industry.
PO5	Leadership Skills	Observing team structures and supervisory roles within the organization.
PO6	Professional Identity	Understanding the pharmacist's role in production, R&D, QA, and regulatory departments.
PO7	Pharmaceutical Ethics	Insight into regulatory compliance, ethical standards, and documentation practices.
PO10	Environment & Sustainability	Learning about waste management, green chemistry practices, and environmental policies.
PO12	Life-long Learning	Motivates students to pursue industrial roles and update their skills for future needs.

10. Industrial Visits

Industrial visits are organized to provide pharmacy students with first-hand exposure to real-world pharmaceutical operations. These visits offer practical insights into manufacturing processes, quality control systems, research and development, and regulatory practices. Such experiential learning helps students better understand their future professional roles and responsibilities, thereby enhancing their technical knowledge, operational awareness, and career readiness.

LIST OF INDUSTRIAL VISIT 2023-2024

S.NO.	DATE	NAME OF THE INDUSTRY
1.	28-02-2024	INDUSTRIAL VISIT, IISER, TIRUPATI
2.	24-08-2024	INDUSTRIAL VISIT TO GIYAAN PHARMA PVT. LTD

INDUSTRIAL VISIT @ IISER - TIRUPATI

The INDIAN INSTITUTE OF SCIENCE EDUCATION AND RESEARCH, TIRUPATI was visited by B. Pharmacy students of Annamacharya College of Pharmacy, for an integral exposure on Science Tour and Visit. The Students were well exposed to physics and Biology laboratories for isolation of DNA and RNA isolation experiments. The students visited the Scientific Expo and gain the knowledge of new research on development of aeroplane wings.

Mrs. B. Nirmala Devi, Associate Professor, Department of Pharmacognosy,

Mr. V. Chinni Krishnaiah, Associate Professor, Department of Pharmacology and student team participated in the science expo.
